SUMMARY

I am a eager individual, I believe I can bring value to any company, I have experience in Python, c#, c++, and Java. I have acquired these skills independently and throughout my time in the CIT (Computer Information Technology) program at lethbridge college. I have a passion for technology and I am always looking to improve and learn new things, especially in the tech field. I have worked on a few applications personally and throughout my program including remaking games such as 2048 and some tic tac toe type games from the ground up. I have worked on many more projects in my course, from data entry systems, user interactive projects such as random number/word guessers and others.

EDUCATION

Graduated From Lethbridge Collegiate Institute in 2018

CIT(Computer Information Technologie), Lethbridge College (current)

EXPERIENCE

Lworld Connect

Lethbridge, Alberta November 2021 - Current

Keyholder at lworld, responsible for managing staff and resolving customer issues as the evening manager on duty. Developed strong team collaboration and leadership skills. Gained hands-on experience with Apple's development tools through training apps, enabling me to assist customers, including developers, more effectively.

Best Buy

Lethbridge, Alberta November 2019 - February 2021

At Best Buy, I gained knowledge in home and business networking, as well as security. Developed critical thinking skills by solving unique customer challenges, such as recommending the right equipment for business server setups. Focused on acquiring a broad skill set and applying it to meet customer needs effectively.
